YuktiOne — PFM Money Tools

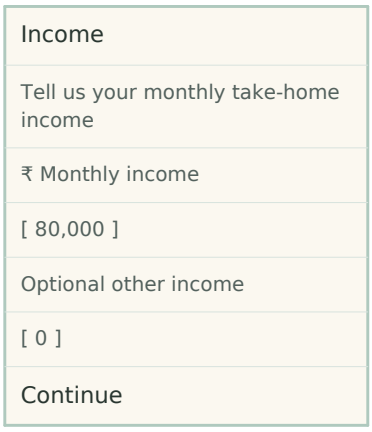

Visual screen specification • 8 free calculators • Developer handoff

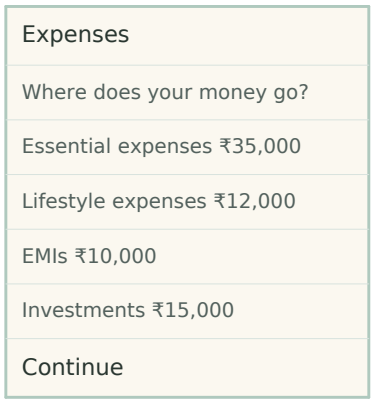

Design direction: eucalyptus/pastel green + warm cream, rounded cards, generous whitespace, strong financial-number hierarchy, minimal clutter.

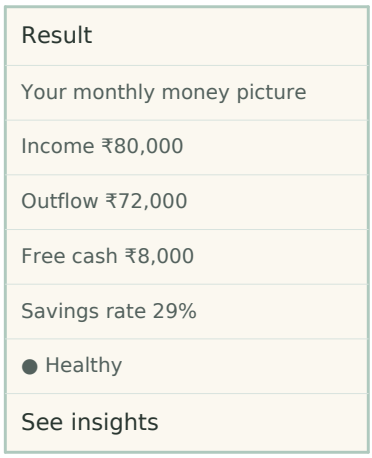

1. Monthly Money Planner

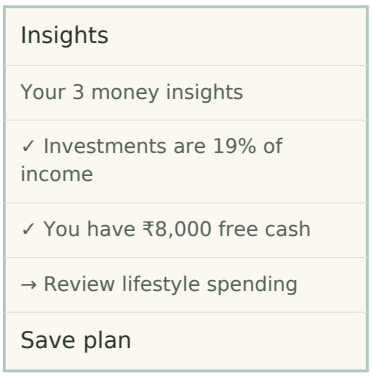

Each phone represents one proposed app screen. These are functional wireframes for the developer/UI designer, not final pixel-perfect designs.

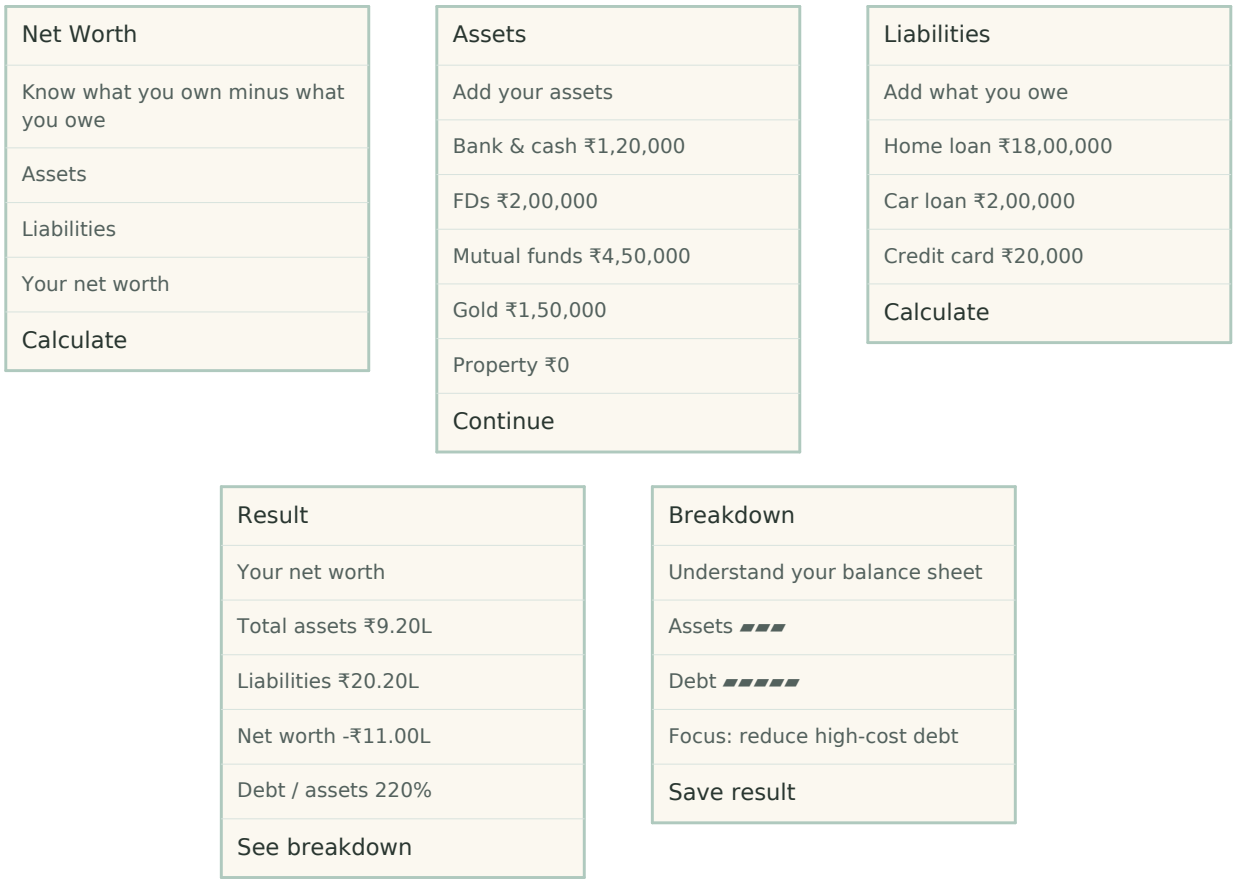

Developer interaction: Inputs must persist when moving backward; result screen must allow Edit Inputs and Recalculate; saved results should have a timestamp and assumption snapshot.

2. Net Worth Calculator

Each phone represents one proposed app screen. These are functional wireframes for the developer/UI designer, not final pixel-perfect designs.

Developer interaction: Inputs must persist when moving backward; result screen must allow Edit Inputs and Recalculate; saved results should have a timestamp and assumption snapshot.

3. Emergency Fund Calculator

Each phone represents one proposed app screen. These are functional wireframes for the developer/UI designer, not final pixel-perfect designs.

Developer interaction: Inputs must persist when moving backward; result screen must allow Edit Inputs and Recalculate; saved results should have a timestamp and assumption snapshot.

4. Financial Goal Calculator

Each phone represents one proposed app screen. These are functional wireframes for the developer/UI designer, not final pixel-perfect designs.

Financial Goal
What are you planning for?
Home
Education
Car
Marriage
Vacation
Child
Custom
Choose goal

Goal inputs
Set your goal
Current cost ₹20L
Time 8 years
Inflation 6%
Current savings ₹2L

Common Screen Components to Build Once

Component	Purpose	Used in
Money Tools Home	Entry point and calculator discovery	All
Intro Card	Explains purpose + CTA	All
Input Field	₹ / % / number / text	All
Category Input List	Expandable expense/asset/debt categories	Money Planner, Net Worth
Assumption Card	Shows editable assumptions	Goal, Retirement, Inflation, Savings
Review Card	Final check before calculation	Debt, Goal, Retirement
Primary Result Card	Large headline result	All
Scenario Card	Compare assumptions	Goal, Debt, Retirement, Savings
Chart Card	Visualise outcome	Money Planner, Net Worth, Debt, Retirement, Savings
Insight Card	Explain what result means	All
Action Card	Next best action	All
Save / History	Persist result and revisit	All

Recommended developer handoff pack

1. This Visual Screens PDF — screen-by-screen reference.
2. Logic Excel — formulas, inputs, outputs, validation and assumptions.
3. UI component list — reusable components and states.
4. Later: Figma file / clickable prototype, API & database specification, analytics events and QA test cases.
