YuktiOne

Refer & Earn — Developer Specification

Simple weekly rewards • referral flows • social sharing • screen logic

Core principle

Make earning feel effortless: users should understand what they can do, how many YuktiPoints they receive, and exactly when the reward is unlocked.

1. Weekly Reward Model

Action	Reward	Weekly rule / trigger
Login / account activity	50 points	Once per week after successful login; maximum 50/week.
Use a YuktiOne tool	25 points	Complete 1 qualifying tool; maximum 25/week from tool usage.
Refer a tool	50 points	Friend signs up through referral + completes the referred tool; maximum 2 successful tool referra
Refer an expert	200 points	Friend signs up through referral + completes a paid expert booking; maximum 1 successful exper
Share on social media	25 points	One verified eligible share per week; maximum 25/week.

Important: Referral rewards are earned only after the referred user completes the required activation step. Do not reward installs or link clicks alone.

2. Simple User Journey

1	**Open Refer & Earn**	User sees weekly earning options + current points.
2	**Choose an action**	Login / Tool / Refer Tool / Refer Expert / Social Share.
3	**Complete action**	System verifies the qualifying event.
4	**Reward**	Points are added to wallet and a small success message appears.
5	**Track**	User sees earned, pending and weekly remaining rewards.

3. Screens — Developer Wireframes

These are functional wireframes, not final visual designs. Use YuktiOne's eucalyptus / cream visual system.

Screen 1 — Home / Entry Card
Show Refer & Earn prominently without making the home screen cluttered.
Refer & Earn
Earn YuktiPoints every week
50 points available from weekly login
Refer a friend • Use a tool • Share YuktiOne
[Earn Now]
Current balance: 150 YuktiPoints

Screen 2 — Refer & Earn Hub
One screen containing all earning options.
Your YuktiPoints 150
THIS WEEK
✓ Login ..... +50
■ Use a tool ..... +25
■ Refer a tool ..... +50
■ Refer an expert ..... +200
■ Share on social ..... +25
[Refer & Earn]
Weekly progress resets every Monday

Screen 3 — Refer a Tool
User chooses a tool and shares a deep link.
Refer a Tool
Choose a tool to recommend
BMI • Water • Calories • Mood • Tarot • etc.
Selected: **BMI Check**
Share with a friend
[WhatsApp] [Copy Link] [More]
Reward: +50 after friend signs up and completes the referred tool.
No reward for clicks alone

Screen 4 — Refer an Expert
Expert referral should be tied to a completed paid booking.
Refer an Expert
Choose / open an expert profile
Share the expert referral link
[WhatsApp] [Copy Link] [More]
You earn +200 points
Friend gets the normal new-user benefit, if applicable.
Reward unlocks after completed paid booking.
Pending → Rewarded

Screen 5 — Social Share
Keep social sharing extremely simple.
Share YuktiOne
Tell your friends about YuktiOne
[Instagram] [WhatsApp] [Facebook]
[Copy Link]
+25 YuktiPoints
One eligible verified share per week.
Avoid repeated reward farming

Screen 6 — Reward Confirmation
Use a lightweight confirmation after each qualifying action.
■ **You're rewarded!**
+50 YuktiPoints added
New balance: **200 YuktiPoints**
You can redeem points on eligible YuktiOne offerings.
[Back to Refer & Earn]
Reward status: Completed

4. Referral Mechanics

Referral type	Share object	Activation event	Reward
Tool referral	Unique tool deep link	New user signs up + completes referred tool	+50 referrer
Expert referral	Expert deep link	New user signs up + completes paid booking	+200 referrer
General invite	YuktiOne invite link	New user signs up + qualifying activation	Use standard referral reward; avoid doul

5. Digital Sharing — Make Referral Almost One Tap

Feature	Developer requirement
Unique referral link	Every user gets one persistent referral ID/link.
Deep linking	If app installed → open relevant screen. If not → landing/app store → preserve referral attribution through signup.
WhatsApp share	Pre-filled short message + referral link. User taps Send.
Copy link	One tap copies referral URL.
More / native share sheet	Use phone's native sharing options for other apps.
QR code	Optional on Refer & Earn screen for offline sharing.
Referral status	Invited → Joined → Activated → Rewarded.

6. Points Wallet & Redemption

Keep the wallet simple: **Available Points**, **Pending Points**, and **History**. Points should not become cash initially. They should be redeemable against eligible YuktiOne tools, services or expert offerings. The exact rupee redemption value should be configured by the business team before launch.

7. Developer Rules / Anti-Abuse

• One welcome/login reward per user per weekly cycle; define whether login means app login or active-session login.

• Do not reward repeated opens, clicks or installs.

• Tool reward requires a completed qualifying tool event.

• Referral reward requires a new user and the required activation event.

• Self-referral is not allowed.

• Prevent duplicate referrals using account, phone/email/device and referral attribution checks as appropriate.

• Maintain a server-side reward ledger; never rely only on client-side point calculations.

• All reward amounts and weekly limits should be configurable from admin.

8. Recommended Developer Data Fields

Field	Purpose
user_id	Identify the referrer and referred user
referral_code / referral_id	Persistent attribution
referral_type	tool / expert / general

Field	Purpose
target_id	Tool ID or expert ID
event_type	signup / tool_completed / booking_completed / social_share
points	Reward amount
status	pending / completed / rejected
week_id	Weekly reward-limit tracking
created_at / rewarded_at	Audit trail

9. Example Weekly User Experience

Monday	User logs in	+50
Tuesday	Completes BMI tool	+25
Wednesday	Refers friend to BMI; friend completes it	+50
Thursday	Shares YuktiOne on WhatsApp/social	+25
Friday	Refers friend to psychologist; friend completes paid booking	+200
Total		**350 points**

10. Final Product Rule

Do not create a complicated loyalty programme. The user should always see one simple message: **“Do something useful on YuktiOne → earn points → use points on YuktiOne.”** Refer Tool and Refer Expert should remain separate buttons because their qualifying events are different.

Developer acceptance checklist

■ Weekly limits are enforced server-side.

■ Referral attribution survives app install/signup.

■ Tool referral rewards only after referred tool completion.

■ Expert referral rewards only after completed paid booking.

■ Social reward cannot be repeatedly claimed for the same share/event.

■ Every reward appears in the points ledger.

■ Pending vs completed rewards are visible to the user.

■ Admin can change reward values and weekly caps without an app release.
