1. Product Logic

Step	Developer behavior
1	User opens Tarot Reflection.
2	User chooses one of six categories.
3	User enters a question. The question is stored for the reading.
4	User chooses only ONE CARD or THREE CARDS.
5	Create a fresh 78-card deck and shuffle it using secure randomization.
6	Display facedown cards. User self-draws by tapping a card.
7	Remove the selected card from the active deck. No duplicate card within the same reading.
8	If reversed cards are enabled, assign upright/reversed at draw time; default = OFF.
9	Generate insight from category + question + spread position + card + orientation.
10	For 3-card reading, generate individual insights then an overall synthesis.
11	Show only two final CTAs: Talk to an Expert and Save Reading.
12	Save reading with date, category, question, spread, cards, orientations and generated insights.

2. Two Spreads Only

Spread	Position	Developer meaning
One Card	Card 1 • Quick Clarity	What do I need to understand right now?
Three Card	Card 1 • Situation	What is happening around this question?
Three Card	Card 2 • Challenge	What may be making this difficult or unclear?
Three Card	Card 3 • Guidance	What perspective may help me move forward?

3. Category Lens

Category	Interpretation lens
Love & Relationships	relationship, emotional needs, boundaries, communication and connection
Career & Work	work direction, skills, confidence, collaboration and practical choices
Money & Finances	resources, security, financial habits, opportunities and practical planning
Personal Growth	self-awareness, habits, confidence, boundaries and growth
Life Direction	values, priorities, transitions and longer-term direction
General Guidance	the broader situation and what may be useful to notice

4. Tarot Card Data Model

Do not hard-code readings into the frontend. Store one master record per card and let the interpretation layer combine the card with category, position and orientation.

Field	Example	Purpose
card_id	major_17	Stable identifier
card_name	The Star	Display name
arcana	Major	Major / Minor
suit	Cups / Wands / Swords / Pentacles	Blank for Major Arcana
number	XVII / Ace / 2 / ...	Deck order
image_url	/tarot/the-star.png	Card artwork
upright_keywords	hope, renewal, inspiration	Short keywords
reversed_keywords	discouragement, doubt	Short keywords
upright_meaning	Hope, renewal...	Core interpretation
reversed_meaning	Discouragement...	Core reversed interpretation
category_lens	Career / Love / Money / ...	Selected by user
position	Situation / Challenge / Guidance	Selected by spread
reflection_prompt	What gives you genuine hope?	Optional final prompt; do not add a separate CTA

5. Interpretation Formula

Final insight = Card meaning + Orientation + Position + Category lens + User question. The same card must therefore produce different wording when it appears as Situation, Challenge or Guidance, without changing the underlying card meaning.

Safety wording: Tarot is for reflection and entertainment. Never state that a card proves another person's thoughts, guarantees a future event, diagnoses a condition, or gives certain financial/medical/legal outcomes.

Relationship rule: use wording such as “may represent,” “can suggest,” or “offers a lens for reflection,” rather than claiming access to another person's mind.

6. Complete 78-Card Developer Deck

Every card below has a core upright and reversed meaning. The app combines these with the selected category and spread position. The XLSX companion file contains the same deck in developer-friendly columns.
